

## Our tips:

When we learn words, we also need to know how to use them. But is that enough? Often grammar plays a role, too. And if grammatical knowledge is lacking, there will be trouble. For this reason our Schnelltrainer combines vocabulary with sample sentences and grammar explanations. The words cover the main fields of basic vocabulary; the grammar deals with important rules of basic grammar.

With the tests you learn the words step by step as used in common speech situations and you also learn their grammar. On the front of each page you will find the test, on the back are the grammar explanations and answer key. You will be able to use most of the sample sentences immediately.

### Add up your correct answers.

#### Example: 15/16

15 = your correct answers, 16 = total answers

There is an evaluation after every ten topics.

**Mark the tests** you have answered correctly and repeat those in which you made errors until you can answer all test questions perfectly.

### Abbreviations:

*umg.* = umgangssprachlich / colloquial speech
